# NeoColab\_REC\_CS23231\_DATA STRUCTURES

REC\_DS using C\_Week 2\_COD\_Question 1

Attempt : 1 Total Mark : 10 Marks Obtained : 10

Section 1: Coding

#### 1. Problem Statement

Your task is to create a program to manage a playlist of items. Each item is represented as a character, and you need to implement the following operations on the playlist.

Here are the main functionalities of the program:

Insert Item: The program should allow users to add items to the front and end of the playlist. Items are represented as characters. Display Playlist: The program should display the playlist containing the items that were added.

To implement this program, a doubly linked list data structure should be used, where each node contains an item character.

**Input Format** 

The input consists of a sequence of space-separated characters, representing the items to be inserted into the doubly linked list.

The input is terminated by entering - (hyphen).

### **Output Format**

The first line of output prints "Forward Playlist: " followed by the linked list after inserting the items at the end.

The second line prints "Backward Playlist: " followed by the linked list after inserting the items at the front.

Refer to the sample output for formatting specifications.

## Sample Test Case

```
Input: a b c -
Output: Forward Playlist: a b c
Backward Playlist: c b a
Answer
#include <stdio.h>
#include <stdlib.h>
struct Node {
char item;
  struct Node* next;
  struct Node* prev;
}:
// You are using GCC
void insertAtEnd(struct Node** head, char item) {
  //type your code here
  struct Node*newNode=(struct Node*)
malloc(sizeof(struct Node));
newNode->item=item;
newNode->next=NULL:
newNode->prev=NULL;
if(*head==NULL)
```

```
return;
      *head=newNode;
    struct Node*temp=*head;
    while(temp->next!=NULL){
      temp=temp->next;
    temp->next=newNode;
    newNode->prev=temp;
    void displayForward(struct Node* head) {
      //type your code here
while(temp!=NULL)
      struct Node*temp=head;
        printf("%c",temp->item);
        temp=temp->next;
      printf("\n");
    }
    void displayBackward(struct Node* tail) {
      //type your code here
      struct Node*temp=tail;
      while(temp!=NULL)
        printf("%c",temp->item);
        temp=temp->prev;
      }
      printf("\n");
    }
    void freePlaylist(struct Node* head) {
      //type your code here
                                                 241801111
while(temp!=NULL)
      struct Node*temp=head;
```

241801111

24,801117

241801111

```
241801111
                                                 241801111
    struct Node*nextNode=temp->next;
    free(temp);
    temp=nextNode;
  head=NULL;
}
int main() {
  struct Node* playlist = NULL;
  char item;
  while (1) {
    scanf(" %c", &item);
                                                                            24,801117
    if (item == '-') {
      break;
    insertAtEnd(&playlist, item);
  struct Node* tail = playlist;
  while (tail->next != NULL) {
    tail = tail->next;
  }
  printf("Forward Playlist: ");
  displayForward(playlist);
                                                                            241801111
  printf("Backward Playlist: ");
  displayBackward(tail);
  freePlaylist(playlist);
  return 0;
}
Status: Correct
                                                                     Marks: 10/10
```
